5. Utility Service Safety:

IMPORTANT—Immediately following an earthquake, check the entire property, especially near appliances, for the smell of gas. If gas odor is detected, turn off the gas at the meter where it enters the house. Locate and repair leaks before turning gas back on. If the gas odor persists after the gas has been shut off, vacate the building and contact the gas utility company immediately.

IMPORTANT—Before entering a damaged, vacant building verify that gas is off. Check the gas meter for damage and position of main gas valve, either a manual valve or a seismically-activated gas shut-off valve. Do not enter the building if gas odor is detected.

Comentarios:

Luego de realizar la inspección ocular en la escuela pudimos observar que la misma no presentaba ningún tipo de daño asociado a los sismos registrados hasta el momento de la inspección. Esto fue comprobado por el personal de la escuela que nos acompañó en la inspección. Aun así, se identificaron unas deficiencias preexistentes a los sismos reportados al momento de la inspección. Estas deficiencias se describen en el anexo que acompaña este informe.

Se debe entender que este informe está basado solamente en una inspección ocular de las facilidades con el propósito de observar en las escuelas la presencia de daños significativos causados por los eventos sísmicos registrados hasta la fecha de este informe. La determinación de la adecuación estructural de las escuelas y su cumplimiento con los códigos aplicables de diseño o construcción, al igual que el desarrollo de recomendaciones para la rehabilitación de las facilidades, requerirá una evaluación detallada.
