

8 de marzo del 2012

Señores:

**GOBIERNO DE PUERTO RICO - DEPARTAMENTO DE EDUCACION**

Presente

**Referencia: Puerto Rico Telephone Company/Claro Puerto Rico como Cisco Partner  
proponente para la Solicitud en E-RATE FY2012 Internal Connections: RFP SF (OC) 2011-17**

De nuestra mayor consideración,

Por la presente, conforme a vuestra relación contractual con Cisco Systems, Inc. ("Cisco") y en el marco del proyecto de la referencia nos complace informarles que de acuerdo a la política de Cisco sobre la discontinuación de productos, en el caso de que Cisco fuera a discontinuar la comercialización de alguno de los productos, como regla general dará un preaviso de 6 meses a la fecha de End-Of-Sale (EOS). Dicha notificación se encontrará publicada en la siguiente dirección web: <http://www.cisco.com/cgi-bin/Support/FieldNoticeTool/field-notice>.

Respecto de la Disponibilidad de Repuestos, los mismos estarán disponibles mientras los equipos se encuentren en producción y por un periodo posterior de cinco (5) años contados a partir de la notificación de su discontinuación (3 años en el caso de software de aplicación), sujeto a que los productos estén cubiertos por un contrato de soporte directo de Cisco. Para mayor información sobre la política de soporte de los productos discontinuados (*End of Life Policy*), consulte en el siguiente sitio web: [http://www.cisco.com/en/US/products/products\\_end-of-life\\_policy.html](http://www.cisco.com/en/US/products/products_end-of-life_policy.html)

Conforme a la política de ciclo de vida de productos de Cisco, los equipos Cisco cubiertos por un contrato de soporte técnico, entre ellos Cisco Smartnet, el usuario final podrán seguir adquiriendo dicho servicio y, el mismo estará disponible, independientemente del partner que los haya vendido originariamente. En caso de ser necesario la renovación o extensión de este periodo, cualquier otro partner de Cisco puede venderle al usuario final estos servicios de Cisco Smartnet para que los equipos continúen con su respaldo del servicio Smartnet de Cisco, en caso que el partner original cesa operaciones.

Sin otro particular, se despide muy atentamente,

A handwritten signature in black ink, appearing to read "MAA".

**Mauricio Ardila**

Gerente de Canales - Caribe

**CERTIFICADO PARA UN CANAL AUTORIZADO**

**Fecha:** 8 de marzo del 2012  
*(This letter was issued as of 08/March/2012)*

**A:** Puerto Rico Telephone Company / Claro Puerto Rico  
San Juan, Puerto Rico

**Referencia:** Departamento de Educacion PR\_FY2012 RFP SF(OC)2011-017 Internal Connections

A efectos del Proyecto de referencia, Cisco Systems, Inc. ("Cisco") confirma en este acto que, a fecha de firma de este documento, Puerto Rico Telephone Company / Claro Puerto Rico es un canal Premier certificado y autorizado por Cisco, y que Cisco y Puerto Rico Telephone Company / Claro Puerto Rico han suscrito un acuerdo para la compra y reventa de Productos y/o Servicios Cisco ("el Acuerdo").

Lo anterior significa que Puerto Rico Telephone Company / Claro Puerto Rico ha cumplido con el proceso de certificación de Cisco y que se encuentra debidamente autorizado para comprar y revender los productos Cisco, así como para negociar los términos y condiciones aplicables a los servicios de soporte y mantenimiento de productos Cisco, incluyendo las correspondientes garantías, de acuerdo con los términos y condiciones de tal Acuerdo.

Asimismo, Puerto Rico Telephone Company / Claro Puerto Rico está especializado en las siguientes tecnologías Cisco:

- Small Business Specialization;
- Express Foundation;
- Advanced Unified Communications;
- Advanced Security

Rogamos tengan en cuenta que el presente certificado no tiene carácter permanente y que el estatus del canal autorizado por Cisco se someterá a una revisión de forma regular. La información contenida en el presente certificado es válida en la fecha indicada en el encabezamiento y durante las seis (6) semanas siguientes a esa fecha.

En caso de necesitar cualquier información adicional, rogamos no dude en ponerse en contacto con Ricardo Batista en al (787) 620-1868.

Brian Fukahara, V.P., Finance  
Cisco Systems, Inc.

# Cisco Catalyst 2960 Series Switches

At-A-Glance

The Cisco® Catalyst® 2960 Series Switches are stand-alone fixed-configuration switches offering Fast Ethernet and Gigabit Ethernet connectivity with LAN services for midmarket and branch office networks.

Cisco Catalyst 2960 Series Intelligent Ethernet switches are offered in two categories:

- Cisco Catalyst 2960 Series with LAN Base software (Figure 1)
- Cisco Catalyst 2960 Series with LAN Lite software

Figure 1. Cisco Catalyst 2960 Models with LAN Base Software

Cisco Catalyst 2960 Series Switches with LAN Base software deliver intelligent services for commercial and midsize enterprise wiring closets and branch offices. The LAN Base software supports enhanced integrated security, including Network Admission Control (NAC), advanced quality of service (QoS), availability, and scalable management to enable new converged applica-

### Primary Benefits

- **Connectivity:** Fast Ethernet and Gigabit Ethernet connectivity in 8-port, 24-port, and 48-port configurations
- **Power over Ethernet (PoE):** 48 PoE ports, 24 full PoE ports and 24-ports (PoE supported on 8 ports) configurations
- **Advanced Services:** Layer 2 switching with intelligent Layer 2 through 4 services for the network edge such as voice, video, and wireless LAN

- Simplified installation, configuration and troubleshooting with ease of use capabilities such as Auto Smart Ports and DHCP Auto Install
- **Security:** Network security enabled through a wide range of authentication methods, data encryption technologies, and NAC based on users, ports, and MAC addresses
- **Advanced availability:** 802.1S/W enables standards-based fault tolerance, load balancing, and rapid recovery; FlexLinks provides sub-100-millisecond convergence; Per VLAN Spanning Tree Plus (PVST+) increases available bandwidth by allowing traffic on redundant links
- **QoS and Multicast:** Industry-leading mechanisms for marking, classification, and scheduling to deliver superior network performance
- Hardware-based multicast services for corporate communications; E-learning, IP video surveillance, high definition video, and distribution of data to desktops in a scalable, reliable and efficient manner
- AC power supply failure protection with external power supply using Cisco Redundant Power System 2300
- **Management:** Cisco Network Assistant simplifies configuration, upgrades, and troubleshooting; Express Setup is quick and easy using the webpage interface
- The ability to enhance sustainability, green IT, and reduce costs with Cisco EnergyWise
- Single IP address, SYSLOG, SNMP management for a stack of up to 16 switches
- Limited lifetime hardware warranty
- Software updates at no additional charge

**Customers**  
The Cisco Catalyst 2960 switches with LAN Base software are for users who:

- Want to power PoE devices, including Cisco IP phones, wireless access points, or IP video cameras.
- Expect intelligent services for new converged applications for midmarket wiring closets and small branch offices
- Are interested in intelligent features and capabilities such as QoS, enhanced security, and availability
- Want to quickly deploy and easily manage their networks and are interested in ease of installation, configuration and troubleshooting

Cisco Catalyst 2960 switches with the LAN Lite software image (Figure 2) simplify the migration from nonintelligent hubs and unmanaged switches to a fully scalable managed network. The LAN Lite Cisco IOS® Software provides entry-level security, QoS, PoE, and availability capabilities while lowering the network total cost of ownership.

Figure 2. Cisco Catalyst 2960 Models with LAN Lite Software

# Cisco Catalyst 2960 Series Switches

At-A-Glance

## Primary Benefits

- Layer 2 Fast Ethernet switching in 8-port, 24-port, and 48-port configurations
  - Power over Ethernet (PoE): 24 full PoE port and 24-port (PoE supported on 8 ports) configurations
  - Security management through SSH, SSL, SNMPv3, and Network Admission Control enabled through 802.1x, MAC-Auth Bypass, and Port Security
  - Availability: 802.1S/W enables standards-based fault tolerance, load balancing, and rapid recovery; PVST+ increases available bandwidth by allowing traffic on redundant links
  - QoS: Traffic classification and shaping to prioritize various applications
  - Management: Cisco IOS software based switch operation, Cisco Network Assistant support; Express Setup is quick and easy using the web page interface for network configuration
  - Simplified installation, configuration and troubleshooting with ease of use capabilities such as Auto Smart Ports and DHCP Auto Install
  - Enhanced troubleshooting for link connectivity issues and cable diagnostics
  - Single IP address, SYSLOG, SNMP management for a stack of up to 16 switches
  - Limited lifetime hardware warranty
  - Software updates available at no additional charge
- Customers**
- The Cisco Catalyst 2960 switches with LAN Lite software are for users who:
- Are looking for basic connectivity with entry-level QoS, PoE, security and availability
  - Want to upgrade their network from hubs and older unmanaged switches for better performance and reliability

- Need to support new applications to provide real-time access to information
- Have limited IT staff and want to quickly deploy and easily manage their networks using a common network management platform
- Need to comply with new data security regulations
- Small and mid-size business customers who want to own and experience Cisco brand reliability and support.

## Ordering Information

## Cisco SGE2010P 48-Port Gigabit Switch: PoE Cisco Small Business Managed Switches

### Performance and Reliability to Support Small Business Networks

#### Highlights

- 48 high-speed ports optimized for the network core or to support bandwidth-intensive applications
- Power over Ethernet easily and cost-effectively powers wireless access points, video cameras, and other network-connected endpoints
- Resilient clustering provides the ability to manage several switches as a single switch to support growing businesses
- Strong security protects network traffic to keep unauthorized users off the network
- Simplified, web-based management for easy installation and configuration
- Limited lifetime warranty

**Figure 1.** Cisco SGE2010P 48-Port Gigabit Switch: PoE

#### Product Overview

The Cisco® SGE2010P 48-Port Gigabit Switch (Figure 1) allows you to expand your network securely. Web-based configuration of the switch is secured using SSL. The Cisco SGE2010P is optimized for maximum system availability, with fully redundant stacking, redundant power options, and dual images for resilient firmware upgrades. The switch helps secure the network through IEEE 802.1Q VLANs, IEEE 802.1X port authentication, access control lists (ACLs), denial-of-service (DoS) prevention, and MAC-based filtering. The enhanced quality of service (QoS) and traffic-management features help ensure clear and reliable voice and video communications.

For wireless or voice over IP (VoIP) deployments, the Cisco SGE2010P supports the IEEE 802.3af standard for Power over Ethernet (PoE). Automatic load sensing enables the circuitry to detect PoE on the end device before providing power. For safety, each port has independent overload and short-circuit protection, along with LED indicators to show power status. It provides 15W of available PoE power on up to 24 of the Gigabit Ethernet ports for powering PoE-enabled wireless access points or VoIP handsets. The maximum PoE available per device for all ports is 360W.

The Cisco SGE2010P provides resilient stacking for up to four units, or 192 ports. A stack of units is managed as a single switch with one web management interface. The Cisco SGE2010P can coexist in a stack with the Cisco SGE2000 and SGE2000P 24-Port Gigabit Switches, and the Cisco SGE2010 48-Port Gigabit Switch, for a maximum of 192 ports in a

stack. The stacking capability includes master/backup unit behavior, ring and chain architecture, and hot insertion and removal of units.

Software running on the Cisco SGE2010P interacts with provisioning, management, and security software on both the site's services router and the service provider's equipment. This interaction provides a simple, one-step installation and access to web-administered features for the administrator and users. Simple, affordable network operations throughout the network's lifetime are the result.

## Features

- Forty-eight 10/100/1000 Ethernet ports
- 4 mini Gigabit Interface Converter (mini-GBIC) slots (shared with 4 Ethernet ports) for fiber Gigabit Ethernet expansion
- IEEE 802.3af PoE delivered over any of the forty-eight 10/100/1000 ports
- 15.4W available power to a Gigabit Ethernet port for PoE-enabled wireless access point or VoIP handsets (maximum per-device PoE delivery of 360W available for all ports)
- Dual images for resilient firmware upgrades
- 96 Gbps nonblocking, store-and-forward switching capacity
- Simplified QoS management using 802.1p, differentiated services (DiffServ) or type of service (ToS) traffic prioritization
- Power redundancy when used with the Cisco RPS1000 380W Redundant Power Supply Unit
- Fully resilient stacking provides optimized growth with simplified management
- ACLs for granular security and QoS implementation
- Configuration and monitoring from a standard web browser
- Secure remote management of the switch via Secure Shell (SSH) and SSL encryption
- 802.1Q-based VLANs enable segmentation of networks for improved performance

## Specifications

Table 1 contains the specifications, package contents, and minimum requirements for the Cisco SGE2010P 48-Port Gigabit Switch.

**Table 1.** Specifications for the Cisco SGE2010P 48-Port Gigabit Switch: PoE

Feature	Description
<b>Specifications</b>	
<b>Ports</b>	48 RJ-45 connectors for 10BASE-T/100BASE-TX/1000BASE-T with 4 Gigabit combo ports shared between mini-GBIC ports; console port; auto medium dependent interface (MDI) and MDI crossover (MDI-X); auto negotiate/manual setting; RPS port for connecting to redundant power supply unit
<b>Buttons</b>	Reset button
<b>Cabling type</b>	Unshielded twisted pair (UTP) Category 5 or better for 10BASE-T/100BASE-TX; UTP Category 5e or better for 1000BASE-T
<b>LEDs</b>	PWR, Fan, Link/Act, PoE, Speed, RPS, Master, Stack ID 1 through 8
<b>PoE</b>	<ul style="list-style-type: none"> <li>• IEEE 802.3af PoE on delivered over any of the 48 10/100/1000 ports</li> <li>• Maximum power of 15.4W to an Ethernet port – 360W total available to all ports with regular AC power, 280W total available with RPS</li> </ul>
<b>Performance</b>	
<b>Switching capacity</b>	96 Gbps nonblocking
<b>Forwarding capacity</b>	71.4 mpps (64-byte packets)
<b>Stacking</b>	

Feature	Description
<b>Stack operation</b>	<ul style="list-style-type: none"> <li>Up to 192 ports in a stack</li> <li>Hot insertion and removal</li> <li>Ring and chain stacking options</li> <li>Master and backup master for resilient stack control</li> <li>Auto-numbering or manual configuration of units in stack</li> </ul>
<b>Layer 2</b>	
<b>MAC table size</b>	8000
<b>Number of VLANs</b>	256 active VLANs (4096 range)
<b>VLAN</b>	Port-based and 802.1Q tag-based VLANs; protocol-based VLAN; management VLAN; multicast TV VLAN; Private VLAN Edge (PVE); Generic VLAN Registration Protocol (GVRP)
<b>Head-of-line (HOL) blocking</b>	HOL blocking prevention
<b>Layer 3</b>	
<b>Layer 3 options</b>	Static routing; classless interdomain routing (CIDR); 60 static routes; IPv4; forwarding in silicon – wire-speed forwarding of Layer 3 traffic
<b>IPv6</b>	
<b>IPv6 options</b>	IPv6 over Ethernet, dual stack, IPv6 over IPv4 network with Intra-Site Automatic Tunnel Addressing Protocol (ISATAP) tunnel, IPv6 neighbor discovery, stateless address configuration, maximum transmission unit (MTU) discovery, WEB, SSL, Telnet, Ping, Traceroute, Simple Network Time Protocol (SNTP), Trivial File Transfer Protocol (TFTP), Simple Network Management Protocol (SNMP), RADIUS, access control lists (ACLs), QoS, protocol based VLANs
<b>Management</b>	
<b>Web user interface</b>	Built-in web user interface for easy browser-based configuration (HTTP/HTTPS)
<b>SNMP</b>	SNMP versions 1, 2c, and 3 with support for trap
<b>SNMP MIBs</b>	RFC1213 MIB-2, RFC2863 interface MIB, RFC2665 Ether-like MIB, RFC1493 bridge MIB, RFC2674 extended bridge MIB (P-bridge, Q-bridge), RFC2819 RMON MIB (groups 1, 2, 3, and 9 only), RFC2737 entity MIB, RFC 2618 RADIUS client MIB, RFC 1215 traps
<b>Remote Monitoring (RMON)</b>	Embedded RMON software agent supports 4 RMON groups (history, statistics, alarms, and events) for enhanced traffic management, monitoring, and analysis)
<b>Firmware upgrade</b>	<ul style="list-style-type: none"> <li>Web browser upgrade (HTTP/HTTPS) and TFTP</li> <li>Dual images for resilient firmware upgrades</li> </ul>
<b>Port mirroring</b>	Traffic on a port can be mirrored to another port for analysis with a network analyzer or RMON probe.
<b>Other management</b>	Traceroute; single IP management; SSL security for web user interface; SSH; RADIUS; port mirroring; TFTP upgrade; Dynamic Host Configuration Protocol (DHCP) client; BOOTP; SNTP; Xmodem upgrade; cable diagnostics; Ping; syslog; Telnet client (SSH secure support)
<b>Security</b>	
<b>IEEE 802.1X</b>	802.1X—RADIUS authentication, MD5 hash; guest VLAN; single/multiple host mode
<b>ACLs</b>	<ul style="list-style-type: none"> <li>Drop or rate limit based on source and destination MAC or IP address, protocol, port, VLAN, differentiated services code point (DSCP)/IP precedence, TCP/ User Datagram Protocol (UDP) source and destination ports, 802.1p priority, Ethernet type, Internet Control Message Protocol (ICMP) packets, Internet Group Management Protocol (IGMP) packets, DHCP snooping, Address Resolution Protocol (ARP) inspection, and IP source address guard</li> <li>Up to 1018 rules</li> </ul>
<b>Advanced Security</b>	<ul style="list-style-type: none"> <li>IP Source Guard</li> <li>STP Root Guard</li> <li>Dynamic ARP Inspection</li> <li>DHCP Snooping</li> </ul>
<b>Availability</b>	
<b>Link aggregation</b>	Using IEEE 802.3ad Link Aggregation Control Protocol (LACP), up to 8 ports in up to 8 groups
<b>Storm control</b>	Broadcast, multicast, and unknown unicast
<b>Spanning Tree</b>	IEEE 802.1D Spanning Tree, IEEE 802.1w Rapid Spanning Tree, IEEE 802.1s Multiple Spanning Tree, and Fast Linkover
<b>DoS prevention</b>	DoS attack prevention
<b>IGMP (version 1 and 2) snooping</b>	Limits bandwidth-intensive multicast traffic to only the requestors; supports 256 multicast groups
<b>Power redundancy</b>	Connection to RPS unit for power redundancy

Feature	Description
<b>Quality of service</b>	
<b>Priority levels</b>	4 hardware queues
<b>Scheduling</b>	Priority queuing and weighted round-robin (WRR)
<b>Class of service</b>	Port-based; 802.1p VLAN priority-based; IPv4/v6 IP precedence/ToS/DSCP based; DiffServ; classification and re-marking ACLs
<b>Rate limiting</b>	Ingress policer; egress rate control; per VLAN
<b>Statistics</b>	16 meters
<b>Standards</b>	802.3 10BASE-T Ethernet, 802.3u 100BASE-TX Fast Ethernet, 802.3ab 1000BASE-T Gigabit Ethernet, 802.3z Gigabit Ethernet, 802.3x flow control, 802.3ad LACP, 802.3af PoE, 802.1D Spanning Tree Protocol (STP), 802.1Q/p VLAN, 802.1w Rapid STP, 802.1s Multiple STP, 802.1x port access authentication
<b>Environmental</b>	
<b>Dimensions W x D x H</b>	17.32 x 14.70 x 1.73 in. (440 x 375 x 44 mm)
<b>Unit weight</b>	10.89 lb (4.94 kg)
<b>Power</b>	100–240V 47–63 Hz, internal, universal; also equipped with external redundant power supply connector for external power supply, –48VDC
<b>Certification</b>	UL (UL 60950), CSA (CSA 22.2), CE mark, FCC Part 15 (CFR 47) Class A
<b>Operating temperature</b>	32° to 104°F (0° to 40°C)
<b>Storage temperature</b>	–4° to 158°F (–20° to 70°C)
<b>Operating humidity</b>	10% to 90%, relative, noncondensing
<b>Storage humidity</b>	10% to 95%, relative, noncondensing
<b>Package Contents</b>	
<ul style="list-style-type: none"> <li>• Cisco SGE2010P 48-Port Gigabit Switch</li> <li>• AC power adapter with power cord</li> <li>• Two rack-mounting kits with eight screws</li> <li>• CD-ROM with user documentation (PDF) included</li> <li>• Registration card</li> <li>• Console cable</li> </ul>	
<b>Minimum Requirements</b>	
<ul style="list-style-type: none"> <li>• Web browser: Mozilla Firefox version 1.5 or later, Microsoft Internet Explorer version 5.5 or later</li> <li>• Category 5 Ethernet network cable</li> <li>• TCP/IP, network adapter, and network operating system (such as Microsoft Windows, Linux, or Mac OS X) installed on each computer in the network</li> </ul>	
<b>Product Warranty</b>	
Limited lifetime warranty with return to factory replacement, one year telephone support and software fixes for the warranty term.	

## Service & Support

Cisco Small Business switches are backed by the Cisco Small Business Support Service, which provides affordable peace-of-mind coverage. This subscription-based service helps you protect your investment and derive maximum value from Cisco Small Business products. Delivered by Cisco and backed by your trusted partner, this comprehensive service includes software updates, access to the Cisco Small Business Support Center, and expedited hardware replacement.

Cisco Small Business products are supported by professionals in Cisco Small Business Support Center locations worldwide who are specifically trained to understand your needs. The Cisco Small Business Support Community, an online forum, enables you to collaborate with your peers and reach Cisco technical experts for support information.

## Cisco Limited Lifetime Hardware Warranty

This Cisco Small Business product offers a limited lifetime hardware warranty with return to factory replacement and a 1-year limited warranty for fans and power supplies. In addition, Cisco offers telephone technical support at no charge for the first 12 months following the date of purchase and software bug fixes for the warranty term. To download software updates, go to: <http://www.cisco.com/cisco/web/download/index.html>.

Product warranty terms and other information applicable to Cisco products are available at <http://www.cisco.com/go/warranty>.

# Cisco Limited 5-Year Hardware and 1-Year Software Warranty Terms

The following are special terms that apply to your hardware and software warranty as well as services you may use during the warranty period. Your formal Warranty Statement appears in the *Cisco Information Packet* that accompanies your Cisco product.

**Hardware Warranty Duration:** Five (5) Years

**Software Warranty Duration:** One (1) Year

**Hardware Replacement, Repair, or Refund Procedure:** Cisco or its service center will use commercially reasonable efforts to ship a replacement part for delivery within fifteen (15) working days after receipt of the defective product at Cisco's site. Actual delivery times of replacement products may vary depending on Customer location.

Cisco reserves the right to refund the purchase price as its exclusive warranty remedy.

**To Receive a Return Materials Authorization (RMA) number:** Please contact the party from whom you purchased the product. If you purchased the product directly from Cisco, contact your Cisco Sales and Service Representative.

**Complete the form below and keep for ready reference.**

Product purchased from:	
Their telephone number:	
Product Model and Serial number:	
Maintenance Contract number:	

Product warranty terms and other information applicable to Cisco products are available at the following URL:

The Power of We™

## Ethernet Routing Switch 4000 Series

The Avaya Ethernet Routing Switch 4000 Series is a Stackable Chassis system providing high-performance, convergence-ready, secure and resilient Ethernet switching connectivity. Available as a range of 17 model variants supporting 10/100 and 10/100/1000 switching and routing, Power-over-Ethernet, Power-over-Ethernet+ and 10 Gigabit Ethernet uplink options, the Ethernet Routing Switch 4000 Series is ideally suited for Enterprise wiring closet and other network edge deployments.

### Highlights Of The Ethernet Routing Switch 4000 Series

- **Always-on** – Best in class end-to-end resiliency solution, hot-swappable unit replacement within a Stackable Chassis and integrated power redundancy.
- **Convergence-ready** – Support for PoE and PoE+, optimized for high-definition video surveillance, true plug and play capabilities for IP Phone deployments, advanced QoS capabilities.
- **Energy efficient** – On average 36% more more energy efficient than competitive solutions,<sup>1</sup> energy saver functionality further reduces power consumption for both Switch and IP Phone without losing telephony connectivity.
- **Powerful** – Wire-speed performance, true pay-as-you-grow Stackable Chassis capabilities, delivering up to 400 ports and 384 Gbps of virtual backplane throughput.
- **Secure** – Standards-based 802.1x with integration with Avaya's Identity Engines portfolio for centralized, policy-based authenticated network access.
- **Flexible** – Mix-and-match best-in-class stacking capabilities; PoE and PoE+ and optional 1GbE and 10GbE SFP+ uplinks.
- **Future-ready** – Hardware ready for advanced services such as Wireless Split-Plane and Virtual Services Fabric; emerging technologies in Avaya's Virtual Enterprise Networking Architecture strategy.

The Ethernet Routing Switch 4000 Series provides resilient Stacking Chassis, Layer 2 switching and dynamic Layer 3 routing, plus many industry leading convergence features. This enables the Ethernet Routing Switch 4000 Series to deliver the scalability and resiliency required by today's application-driven enterprise networks while reducing total operational costs.

### Intelligent Stackable Chassis solution delivering performance, scalability, resilience and flexibility

No one knows stacking like Avaya. We introduced our first Stackable Chassis product in 1998 and have been perfecting the technology ever since. We were the first and only vendor to break the Terabit

boundary with our ERS 5600 Series products and we've differentiated ourselves in the industry by ensuring that our Stackable Chassis perform like a traditional modular chassis implementation. We offer genuine chassis-like features including true pay-as-you-grow scaling and in-service maintenance and restoration. From a management perspective, our Stackable Chassis looks like a single network entity – utilizing only a single IP address to dramatically simplify software upgrades. We also offer true investment protection with the ability to mix-and-match any units within the ERS 4000 Series into a Stackable Chassis.

### High performance architecture with true pay-as-you grow scaling

Our Stackable Chassis products combine non-blocking internal switching fabrics with a high-speed virtual backplane architecture to deliver a high performance solution that scales proportionally as new switches are added. The ERS 4000 Series scales up to 384Gbps of virtual backplane throughput by simply cabling together up to 8 units. Adding a new unit to the Stack Chassis is as easy as cabling in a new member then extending the appropriate configuration. The necessary software images and the configuration file are automatically downloaded to the new unit and then brought on-line without any user intervention.

To ensure wire-speed performance, our Stackable Chassis architecture is based on a shortest-path algorithm for optimal data flow across the stack. Unlike competitive solutions that use unwieldy logical ring or token technology, Avaya allows traffic to flow upstream and downstream simultaneously from every switch connected to the virtual backplane, optimizing performance, resiliency,

## ERS 4000 Series v5.6 introduces 6 additional models into the ERS 4000 product family.

### New Model Highlights:

- IEEE 802.3at-compatible PoE+ for both Fast Ethernet and Gigabit Ethernet connected end points.
- SFP+ ports, supporting 1 and 10 Gigabit connections, on the new 4800 models.
- Redundant field-replaceable AC power supplies on all new models.
- Increased CPU and FLASH memory for greater investment protection.
- Full Stackable Chassis compatibility with all existing 4500 models.
- 4800 models are hardware-ready to support advanced, next-generation network edge technologies such as IPv6, Wireless Split-Plane and the Virtual Services Fabric.

### New ERS 4500 PoE+ Models for Fast Ethernet Connectivity:

- **Ethernet Routing Switch 4526T-PWR+** - 24 port 10/100 ports with PoE/PoE+ plus 2 10/100/1000/SFP uplink ports.
- **Ethernet Routing Switch 4550T-PWR+** - 48 port 10/100 ports with PoE/PoE+ plus 2 10/100/1000/SFP uplink ports.

### New ERS 4800 models for Gigabit Ethernet Connectivity:

- **Ethernet Routing Switch 4826GTS** - 24 ports of 10/100/1000 ports including 2 shared SFP Uplink ports, plus 2 additional SFP+ Uplink ports.
- **Ethernet Routing Switch 4826GTS-PWR+** - 24 ports of 10/100/1000 ports with PoE/PoE+ including 2 shared SFP Uplinks ports, plus 2 additional SFP+ Uplink ports.
- **Ethernet Routing Switch 4850GTS** - 48 ports of 10/100/1000 ports including 2 shared SFP Uplink ports, plus 2 additional SFP+ Uplink ports.
- **Ethernet Routing Switch 4850GTS-PWR+** - 48 ports of 10/100/1000 ports with PoE/PoE+ and 2 shared SFP Uplink ports, plus 2 additional SFP+ Uplink ports.

The v5.6 feature release also includes a wide range of software enhancements including: ECMP (Equal Cost Multi-Path) Support, IGMPv3 Snooping and Proxy, increased VLAN scaling and many more enhancements around convergence, operations and security.

and resource utilization. Avaya has an additional advantage in that we honor Quality-of-Service settings as traffic passes over the stacking connections – providing applications with optimal performance, and a positive end user experience.

All ERS 4000 models come with two in-built Stackable Chassis interfaces for simple, cost-effective and efficient connectivity. Unlike comparative offerings which daisy chain low-speed interfaces, this design frees uplink ports for dedicated connectivity to the backbone. In addition to the stacking cables, a return cable is also used to protect against any port, unit or cable failures.

### In-service maintenance and restoration

Virtual hot swap capabilities ensure that a failure in any unit of the Stackable Chassis is quickly and easily rectified. Pioneered in modular switches, virtual hot swap is available in Avaya's Stackable Chassis solutions enabling immediate like-for-like unit replacement without any impact to the existing traffic or any units. If a failure occurs, neighboring switches automatically wrap their fabric connections to help ensure that other switches within the Stackable Chassis are not impacted. The failed unit is simply disconnected from the virtual backplane and, without pre-staging of software or configuration, a like-for-like unit is inserted, cabled, and powered-up. The Automatic Unit Replacement (AUR) process self-manages software and configuration downloads to the new switch then brings it online, without the need for an engineer to configure or manage the process.

Further complementing the Stackable Chassis architecture, the Avaya ERS 4000 Series supports standards-

based 802.3ad Link Aggregation as well as its own Multi-Link Trunking technology that allows grouping of ports to form high-speed trunks/aggregations. These bundles or groups of ports can be distributed across different units in the same Stackable Chassis, delivering higher levels of resilience in case of link or Switch failure to help ensure that traffic gets to its destination.

Distributed real-time monitoring of the Stackable Chassis provides an at-a-glance view of operational status and health which further enhances operational and management simplicity.

### Centralized management

From a management perspective, our Stackable Chassis appears as a single networking entity – utilizing only a single IP Address. This can significantly reduce the number of switches to be managed within the network as a stack of up to 8 switches can be managed just as easily as a single switch. All Ethernet Routing Switch 4000 models use the same software image, irrespective of model type. The image needs to be loaded only to the base unit of the Stackable Chassis which automatically loads it to other switches.

### Flexible options

It's possible to mix and match any member of the ERS 4000 Series into a single Stackable Chassis. This allows customers to create the best mix of ports based on their specific requirements. Fast Ethernet and Gigabit Ethernet models can be interconnected; PoE and PoE+ models can also be mixed in the same Stackable Chassis. The ERS 4000 Series can scale up to 8 units and 400 ports with up to 384Gbps of virtual backplane bandwidth.

ERS 4000 Stackable Chassis

## Highlights of Avaya's Stackable Chassis technology:

**True pay-as-you-grow scaling:** Extending capacity is easy. Simply cable a new unit into the virtual backplane and the configuration is automatically updated.

**Scalable performance:** The high performance design of Avaya's Switches along with their high-speed interfaces (up to 384Gbps) helps ensure that the Stackable Chassis scales proportionally as each new unit is added.

**Optimal path forwarding:** The shortest, most optimal path is chosen for each flow of traffic with QoS being maintained across the virtual backplane.

**No single point-of-failure:** Stackable Chassis operations are unaffected by the failure of any individual unit and units can easily be replaced within minutes.

**Centralized management:** Single IP address for the entire Stackable Chassis for simplified management.

**Flexible stacking options:** Mix-and-match any member of the ERS 4000 Series into a single Stackable Chassis.

## Convergence-ready for Unified Communications, High-Definition Video and more

For businesses looking to consolidate all forms of communication – voice, video and data – on a single infrastructure, the Avaya ERS 4000 Series delivers functionality that simplifies convergence of these technologies.

### Choice of PoE or PoE+ to power your devices

Through support for both the IEEE 802.3af PoE and 802.3at PoE+ standards, ERS 4000 products are able to power IP phones, wireless access points, networked high-definition CCTV cameras and other devices. This eliminates the need for separate power supplies for each unit, enabling reduced cabling and management costs for adds, moves, or changes.

Customers have the flexibility of choosing a PoE capable device or a PoE/PoE+ capable device. Having PoE+ support gives customers investment protection even though the driver for higher power usage is not present in many of the end devices typically being used.

### Plug and play for IP phones

One of the main benefits offered by the ERS 4000 Series is plug and play support for IP phones enabled through a combination of IEEE 802.1ab Link Layer Discovery Protocol (LLDP) and Avaya's Auto Discovery and Auto Configuration (ADAC) capability.

With these features enabled the ERS 4000 can automatically provision end devices such as IP Phones for simplified deployments and moves. The ERS 4000 dynamically applies the correct VLAN and QoS to both the IP phone and the attached edge port. When the phone is moved to another location, the configuration is automatically updated. In addition, QoS is automatically provisioned on the ERS 4000 uplink so that voice is given top priority from the wiring closet to the network core. These features save network operators time and can dramatically reduce the likelihood of a provisioning error during a large IP phone deployment.

The ERS 4000 also learns the identification, configuration, and capabilities of neighboring devices and provides these details to the network management system. This enables the system to have the most

up-to-date physical view of the network so that communication configuration mismatches are detected and corrected quickly.

### Sophisticated QoS capabilities

The ERS 4000 Series delivers unsurpassed control for networks supporting a wide range of different application types. The ERS 4000 classifies, prioritizes and marks LAN IP traffic using up to eight hardware queues (2 strict priority and 6 weighted round robin) on every port – including our Stackable Chassis ports.

Classification can be done based on MAC address, IP ToS/DSCP marking, IP source /destination address or subnets, TCP/UDP source/destination port/port range, IEEE 802.1p user priority bits, ingress source port, IP Protocol ID (e.g., TCP, UDP, IGMP),

Requirement	ERS 4500 Models	ERS 4500 POE+ Models	ERS 4800 Models
<b>Fast Ethernet to the desktop</b>	Yes	Yes	Yes
<b>Gigabit Ethernet to the desktop</b>	Yes	No	Yes
<b>IEEE 802.3 af PoE</b>	Yes	Yes	Yes
<b>IEEE 802.3 at PoE+</b>	No	Yes	Yes
<b>10 Gig uplink sockets</b>	XFP on certain models	No	SFP+
<b>Redundant power</b>	Yes (available through external RPS 15)	Yes (internal field-replaceable PSU's)	Yes (internal field-replaceable PSU's)
<b>Hardware-ready for advanced services (Wireless Split Plane, Virtual Services Fabric)</b>	No	No	Yes

With 17 different models delivering a broad range of capabilities, the ERS 4000 Series meets diverse edge requirements.

EtherType (e.g., IP, IPX) or the IEEE 802.1Q VLAN ID. Comprehensive traffic policing and traffic shaping are also supported.

Most importantly we make QoS management intuitive through the use of Enterprise Policy Manager.<sup>2</sup> By centralizing QoS management, Enterprise Policy Manager can reduce thousands of CLI or web transactions to a few simple actions through intuitive workflows.

## Always-On Networking

In the era of 24x7 business operation, providing always-on access to applications is of the utmost importance. A pioneer in this area, Avaya provides cost-effective, resilient campus solutions for any size enterprise - from very large to very small.

### Multi-link and Distributed Trunking

The ERS 4000 Series supports 802.3ad Link Aggregation Groups as well as its own Multi-Link and Distributed Multi-Link Trunking implementations. Groups of links between the ERS 4000 and another device can be aggregated to enhance bandwidth and resiliency through active redundant links. Additionally, trunked ports can span multiple units of a Stack Chassis enabling fail-safe connectivity to mission-critical servers and the network core.

Integrated field replaceable AC power supplies for ERS 4800 and ERS 4500 POE+ models

### Distributed Multi-Link Trunking

802.3ad Link Aggregation Groups can be combined with Switch Clustering (leveraging Avaya's Split Multi-Link Trunking technology) on our core products (VSP 9000, ERS 8800/8600/8300 and ERS 5000). This creates a self-healing network that maximizes reliability and availability. Because all ports remain active, multiple connections to the network core enable customers to double their network bandwidth without incurring additional cost.

### Virtual Router Redundancy Protocol

The ERS 4000 Series supports the Virtual Router Redundancy protocol. This feature enables automatic assignment of available IP routers to participating hosts which increases the availability and reliability of routing paths via automatic default gateway selections on an IP sub network.

### Detection of link failures and loops

The ERS 4000 Series support a number of features that help detect and prevent link failures and loops. Avaya's Virtual Link Aggregation Control Protocol (VLACP) detects end-to-end failures by propagating link status between ports that are logically connected point-to-point across an intermediate network.

For loop detection, the ERS 4000 supports Simple Loop Prevention Protocol (SLLP) Guard. This feature extends Avaya's loop prevention mechanism of SLPP to the edge of the network for improved network resiliency. SLPP-guard operates in conjunction with SLPP in the network core or distribution layer and is designed to detect unusual loop scenarios which are not detected by other methods such as Spanning Tree. SLPP-guard immediately detects loops and disables affected ports according to the configured timer. All SLPP-guard actions are logged via Syslog and SNMP traps so that the cause of the loop can be diagnosed accurately.

### Redundant power support

The ERS 4500 PoE+ models and the ERS 4800 models (both PoE/PoE+ and non-power enabled) support field replaceable AC power supplies for improved redundancy and uptime. This power supply design offers N+1 power redundancy and/or supplementary PoE/PoE+ power budget, saving valuable rack space and enabling reduced system, servicing and sparing costs. Non-power models such as the ERS 4826GTS and the ERS 4850GTS utilize two 300 Watt Power Supply Units for redundancy (same as the ERS 5600 Series products) while the PoE/PoE+ devices, such as the ERS 4526T-PWR+, ERS 4550T-PWR+, ERS 4826GTS-PWR+ and ERS 4850GTS-PWR+ utilize two 1000 Watt Power Supply Units for redundancy.

The traditional ERS 4500 models support redundant power via Avaya's Redundant Power Supply 15 (RPS 15). This allows the ERS 4500 to deliver the stable, redundant power support required by today's high-availability, mission-critical environments. The RPS 15 Chassis supports up to three 600 watt power supply modules, with each module providing redundant power support to one ERS 4500 PoE Switch or up to four non-PoE models.

## Achieve your Green IT initiatives

### Energy efficient by design

New regulations and rising awareness of the ever-increasing cost of electrical power keep energy efficiency top of mind. An innovator in this area, Avaya has built energy efficiency into many of its hardware products. In fact, independent testing indicates that Avaya LAN Switches, Call Servers, Gateways, Unified Messaging Servers and Gigabit IP Phones are typically more energy-efficient than competitive equipment. The ERS 4000 Series, for example, was found on average to be 36% more energy efficient than competitive solutions from Cisco, HP, and Juniper.<sup>1</sup> Because most Ethernet Switches operate 24x7, a 36% reduction in energy use goes a long way toward reducing yearly total cost of ownership.

### Power management solution that keeps all connected devices operational

Building on our energy efficient design, Avaya offers true power management capabilities on ERS 4000 Series switches with our Avaya Energy Saver feature. Avaya Energy

Saver aligns consumption of energy with attributes such as building occupancy. Much like a lighting control system, it essentially "dims" energy consumption during off-peak periods.

PoE and PoE+ enabled devices can increase energy conservation because, when IP phones are connected to a PoE or PoE+ port, power consumption by the IP phone is reduced when the network is in to dimmed operation mode. When an Avaya IP phone is connected to the ERS 4000 and Avaya Energy Saver is active, the switch sends a proprietary 802.1AB TLV message to the phone that places the phone in maximum power conservation mode. Unlike some competitive solutions that actually disable the IP phone by turning ports off, IP phones remain operational when in power conservation mode.

Energy conservation by ERS 4000 series switches and the IP phones connected to them can reduce total cost of ownership while helping IT managers achieve their "Green IT" initiatives.

### Energy analysis

Avaya Energy Saver can be embedded within the Avaya Enterprise Policy Manager<sup>2</sup> to provide centralized management of power consumption across all devices and endpoints. Network operators can perform energy analysis that not only shows peak energy usage and trending but also calculates real energy savings in terms of dollars and cents. A dashboard through which IT managers can drill down to specific ports and adjust ERS 4000 port speeds, as required, is also available.

## Securing access at the edge

The Ethernet Routing Switch 4000 offers the highest level of security with authenticated network access that leverages IEEE 802.1x (Extensible Authentication Protocol (EAP) with extensions or devices MAC Address, Integration into Avaya's Identity Engines portfolio for centralized, policy-based access control is included along with secure management enabled through features such as Secure Shell (SSH), Secure Sockets Layer (SSL), Simple Network Management Protocol (SNMPv3), IP Manager List, Remote Authentication Dial-In User Service (RADIUS), and TACACS+ authentication. The ERS 4000 Series also offers numerous features that help prevent direct Denial of Service Attacks.

### Authenticated Network Access

The ERS 4000 offers a wide range of flexible security options to help ensure that only authorized personnel can access the LAN. Through IEEE 802.1x-based EAP client or device MAC Address, network administrators control authentication and authorization for access to network resources. Ethernet Routing Switch 4000 can support authentication of multiple devices/users on a single port.

For example, if a user's PC connects into the network via an IP phone, the PC and the IP phone can be independently authenticated on the same port. And, if your company has visiting users, guest VLAN support allows non-authenticated users to use the network with access to predefined guest resources only, such as Internet access. ERS 4000 Series

also allows configuration of different servers to handle different RADIUS/802.1x functions.

When advanced, policy-based and centralized user/device authentication is required, the Avaya ERS 4000 can be used in conjunction with the innovative Avaya Identity Engines portfolio solution. This easy-to-deploy, policy-based solution assigns network access rights and permissions based on user role, where the user connects (local or remote) and how the user connects (wired or wireless). In this way, each connected device and user are known and are governed by device-specific security policies. For example, based on her network credentials, an employee using a corporate owned device will be granted full corporate access however, while using a non-corporate-owned device, she will be granted limited access.

As the number of employee-owned devices increases, Identity Engines can help network operators retain control and, by running device health checks and verifying user and device credentials, Identity Engines helps ensure that network access permission levels are enforced and adhered to without undue effort on the part of the IT staff.

### **Secure Management**

The ERS 4000 Series supports Secure Shell (SSHv2) for strong authentication and encrypted communication and SSL, which is supported on our web-based Enterprise Device Manager. SNMPv3 provides user authentication and data encryption for secure configuration and monitoring while IP Manager List limits access to ERS 4000 management features via a list of IP Addresses or IP ranges/subnets, providing greater security and manageability.

### **Preventing Directed Attacks**

Through advanced security services, the ERS 4000 Series actively protects against malicious network attacks including protection from snooping of DHCP services, verification and filtering of ARP traffic via in-hardware processing (Dynamic ARP inspection), restriction of IP traffic to registered end devices (IP Source Guard), and control of Spanning Tree BPDU flow within the network (BPDU Filtering). Also supported, MAC Security and Static MAC address assignment have the ability to disable MAC learning if required.

The ERS 4000 supports advanced packet classification and deep packet filtering of up to 128 bytes, helping block unwanted network traffic while forwarding mission-critical traffic efficiently.

The ERS 4000 is PCI 2.0 compliant and, as per the PCI 2.0 specification, authentication and logging takes place and can be captured and reported to mitigate any security risk of shared maintenance accounts.

### **Secure and simplified network management**

Creating a flexible operational environment, the ERS 4000 Series can be managed by a variety of management tools:

- Highly intuitive industry-aligned Command Line Interface (CLI) that eases the transition from one vendor to another.
- GUI and Web-based, Enterprise Device Manager (EDM) is an element management tool that enables quick, easy configuration changes to a single device through a pictorial view of that device using either HTTP or HTTPS (Secure Web).

## **Consumerized IT**

The move to “consumerized” IT has been described as penetration of the corporate network by employee-purchased mobile devices like iPhone, iPad, and Android phones. Whereas at one time employees had, at most, one device connecting to the corporate network, that number is expected to grow to 3, even 4 devices. Avaya Identity Engines helps network operators manage level of network access for this increasing number of devices by running device health checks and by verifying credentials of both user and device. Cost effective and easy to use, Avaya Identity Engines works in a multivendor environment.

- SNMP-based management (SNMP v1, 2 and 3) that provides an alternative standards based management approach and an interface for Configuration and Orchestration Manager.
- A wide array of Avaya management platforms that can be chosen based on the tasks the customer wishes to perform and the size of their environment.

These platforms include:

- **Configuration and Orchestration Manager (COM)** - Simplifies multi-element configuration via wizards and templates and provides network discovery, device backup, audits configuration changes, and bulk configuration management.
- **Enterprise Device Manager** - Simple on-switch GUI-based interface enabling simple device based provisioning.
- **Virtualization Performance and Fault Manager<sup>2</sup> (VPFM)** - Monitors and audits network performance, provides discovery and inventory, and troubleshoots network issues, which can minimize events and reduce network downtime. VPFM supports multi-vendor environments and proactive monitoring, helping to identify issues before they affect the network.
- **Enterprise Policy Manager<sup>2</sup> (EPM)** - Enables end-to-end policy provisioning to optimize network performance, define QoS filters, and deploy traffic and security filtering.
- **IP Flow Manager<sup>2</sup> (IPFM)** - Provides insight into network utilization, top applications, peak usage, and traffic patterns to help diagnose problems at the network and application level through use of standards-based IPFIX.

## Designed for the next-generation edge

ERS 4800 models have been architected to support the advanced services required in a next-generation campus edge solution including support for IPv6 routing and advanced innovative Avaya services such as Wireless Split-Plane and the Virtual Services Fabric.

### Avaya Virtual Services Fabric<sup>3</sup>

The ERS 4800 models are hardware-ready to support the Avaya Virtual Enterprise Network Architecture (VENA) Virtual Services Fabric which will extend the reach of Virtualized Services from the Data Center all the way to the campus edge. This provides a consistent enterprise-wide virtualization architecture that is simpler, more adaptive and more reliable - while avoiding the complexity associated with interconnecting different forms of technology for different areas of the network. Furthermore, as Virtual Desktop Infrastructure becomes more prevalent, extension of the Virtual Services Fabric to the campus edge will create the most efficient user-to-server interconnection and enabling enterprises to present business applications (that reside in the Data Center) transparently to thin clients

with optimal performance. Ultimately, this will allow enterprises to save money budgeted for desktop support and maintenance costs without sacrificing desktop application performance.

### Avaya Wireless Split-Plane<sup>3</sup>

The campus edge of the future will need to address two major transitions: (1) wireless displacing wired as the primary means of network access (2) a proliferation of high-definition video applications. Wireless Split-Plane, an Avaya innovation, helps enterprises prepare for these changes by decoupling the wireless control functionality from the application data. This architecture, which can be imbedded directly into the Ethernet Switch infrastructure, eliminates the performance bottleneck inherent in today's centralized Wireless LAN architectures (traffic hair pinning through controllers) and ensures that wireless data traffic takes the most optimal path from source to destination. And, because it enables common hardware reuse, fewer network components, and optimized scalability, it can lower operating costs.

## **Avaya VENA Virtual Services Fabric: Simple, Dynamic, Adaptive**

Deploying Avaya's Virtual Services Fabric allows enterprises to greatly simplify creation and configuration of their next generation networks. It creates a multipath Ethernet network that relies on Intermediate System-to-Intermediate System (IS-IS), a proven carrier-grade link state protocol, to dynamically build the topology between nodes – which keeps provisioning at the edge of the network. This can save network administrators time and effort, and virtually eliminate human error.

This architecture gives network operators the flexibility they need to add network capacity or a new link, and have them be automatically discovered with no impact on any existing services. Adding new services or changing existing services can be completed more quickly and easily by provisioning each end point. The network does the rest.

### **Lifetime warranty**

Avaya includes industry-leading warranty services for our portfolio of Stackable Chassis Switches, including Avaya ERS 4000 Series products. The warranty includes complimentary next-business-day shipment of failed units for the life of the product (including fans and power supplies), next-business-day shipping worldwide on replacement of failed hardware, and basic technical support as follows: Level 1 for the supported lifecycle of the product and up to Level 3 for the first 90 days after purchase. This includes support for the shipped software version, with an option to purchase the Software Release Service for access to new feature releases and additional advanced hardware replacement programs.

### **Summary**

Avaya is positioned to provide an end-to-end solution for today's converged networks and for tomorrow's networks. The Ethernet Routing Switch 4000 Series, along with other Avaya products, can increase profitability and productivity, streamline business operations, lower costs and help your business gain a competitive edge.

The Power of We™

## Avaya Ethernet Routing Switch 4500 Series

### Highlights Of The Ethernet Routing Switch 4500 Series

- **Always-on** – Best in class end-to-end resiliency solution, hot-swappable unit replacement within a Stack Chassis and integrated power redundancy.
- **Convergence-ready** – Support for PoE, true plug and play capabilities for IP phone deployments, advanced QoS capabilities.
- **Energy efficient** – On average 36% more energy efficient than competitive solutions,\* energy saver functionality further reduces power consumption for both switch and IP phone without losing telephony connectivity.
- **Powerful** – Wire-speed performance, true pay-as-you-grow Stack Chassis capabilities, delivering up to 400 ports and 384 Gbps of virtual backplane throughput.
- **Secure** – Standards-based 802.1x with integration to Avaya's Identity Engines portfolio for centralized, policy-based authenticated network access.
- **Flexible** – Mix-and-match best-in-class stacking capabilities; Fast Ethernet and Gigabit Ethernet in the same Stackable Chassis, with or without PoE.

The Ethernet Routing Switch 4500 Series provide resilient Stackable Chassis capabilities, high performance Layer 2 switching and Layer 3 routing, advanced convergence features and a full suite of security, QoS and management capabilities.

Positioned for customers who are looking for Fast Ethernet or Gigabit Ethernet to the desktop, support for PoE and optional support for 10 Gig uplinks, the ERS 4500 provides a flexible high-performance platform to meet the demands of the converged edge. With 11 different models, the ERS 4500 products provide the widest breadth of options to meet a diverse range of edge requirements.

The Avaya Ethernet Routing Switch 4500 Series is a Stackable Chassis system providing high-performance, convergence-ready, secure and resilient Ethernet switching connectivity. Available in 11 model variants supporting 10/100 and 10/100/1000 connectivity, switching and routing, Power-over-Ethernet, and 10 Gigabit Ethernet uplink options, the Ethernet Routing Switch 4500 Series is ideally suited for Enterprise wiring closet and other network edge deployments. The Ethernet Routing Switch 4500 are part of the 17 model Ethernet Routing Switch 4000 product family that meets your needs by enabling true mix and match capabilities.

Requirement	ERS 4500 Models	ERS 4500 PoE+ Models	ERS 4800 Models
<b>Fast Ethernet to the desktop</b>	Yes	Yes	Yes
<b>Gigabit Ethernet to the desktop</b>	Yes	No	Yes
<b>IEEE 802.3 af PoE</b>	Yes	Yes	Yes
<b>IEEE 802.3 at PoE+</b>	No	Yes	Yes
<b>10 Gig Uplink sockets</b>	XFP	No	SFP+
<b>Redundant power</b>	Yes - available through external RPS 15)	Yes - internal field-replaceable PSUs	Yes - internal field-replaceable PSUs
<b>Hardware-ready for advanced services (Wireless Split-Plane, Virtual Services Fabric)</b>	No	No	Yes

**With 17 different models, the ERS 4000 Series offers a wide range of capabilities to meet a diverse range of edge requirements.**

## Summary

To ensure full interoperability across the complete ERS 4000 portfolio, the rear-mounted Stackable Chassis interfaces used on the ERS 4500 are consistent with those used on the newer ERS 4500 PoE+ models and the ERS 4800 models. Each ERS 4000 Switch delivers up to 384Gbps when eight units are combined.

The ERS 4500 Series is well suited for demands of the high-performance converged edge. The ERS 4500, along with other Avaya products, can increase profitability and productivity, streamline business operations, lower costs and help your business gain a competitive edge.

## ERS 4500 Series Models

Fast Ethernet Models	
Model	Uplink and ports
<b>ERS 4526FX</b>	24 100BASE-FX ports, plus 2 Combo 10/100/1000/SFP Uplink ports
<b>ERS 4526T</b>	24 10/100BASE-TX ports, plus 2 Combo 10/100/1000/SFP Uplink ports
<b>ERS 4526T-PWR</b>	24 10/100BASE-TX ports supporting 802.3af PoE, plus 2 Combo 10/100/1000/SFP Uplink ports
<b>ERS 4550T</b>	48 10/100BASE-TX ports, plus 2 Combo 10/100/1000//SFP Uplink ports
<b>ERS 4550T-PWR</b>	48 10/100BASE-TX ports supporting 802.3af PoE, plus 2 Combo 10/100/1000/SFP Uplink ports 48 x 10/100BASE-TX PoE plus 2 x Combo 10/100/1000BASE-T or 100/1000BASE-SFP

Gigabit Ethernet Models	
Model	Uplink and ports
<b>ERS 4524GT</b>	24 10/100/1000BASE-T ports, including 4 shared SFP Uplink ports
<b>ERS 4524GT-PWR</b>	24 10/100/1000BASE-T ports supporting 802.3af PoE, including 4 shared SFP Uplink ports
<b>ERS 4548GT</b>	48 10/100/1000BASE-T ports, including 4 shared SFP Uplink ports
<b>ERS 4548GT-PWR</b>	48 10/100/1000BASE-T ports supporting 802.3af PoE, including 4 shared SFP Uplink ports
<b>ERS 4526GT</b>	24 10/100/1000BASE-T ports, including 4 shared SFP Uplink ports, plus 2 10Gigabit XFP Uplink ports
<b>ERS 4526GT-PWR</b>	24 10/100/1000BASE-T ports supporting 802.3af PoE, including 4 shared SFP Uplink ports, plus 2 10Gigabit XFP Uplink ports

Note: ERS 4500 Series models that support the 100/1000BASE-X SFP capability, namely 4526FX, 4526T, 4526T-PWR, 4550T, 4550T-PWR, 4524GT, 4524GT-PWR, also support the 100Base FX and T1 Ethernet over TDM Pluggable Transceiver.

General Performance	
Switch Fabric performance: 48.8Gbps to 184Gbps	DHCP Snooping: up to 1,024 table entries
Frame forwarding rate: 6.6 to 72Mpps	802.1X Clients: up to 768
Stack Throughput: 384Gbps	LLDP Neighbors: up to 800
Latency (64 byte packet): 3.5 microseconds	ARP Entries: up to 1,792
Jitter (64 byte packet): 0.84 microseconds	IP Interfaces: up to 64
Frame length: 64 to 1518 Bytes (802.1Q Untagged), 64 to 1522 bytes (802.1Q Tagged)	IPv4 Routes: up to 512
Jumbo Frame support: up to 9,000 Bytes (802.1Q Tagged)	OSPF Instances: up to 4
Multi-Link Trunks: up to 32 Groups, with 8 Links per Group	OSPF Adjacencies: up to 16
VL ANs: up to 1,024 Port/Protocol/802.1Q-based	ECMP Paths: up to 4
Multiple Spanning Tree Groups: 8	VRRP Instances: up to 256
MAC Address: up to 8k	IPFIX Sampled Flows: up to 100,000
Pluggable Interfaces	
1000BASE-T SFP up to 100m over CAT5E or better UTP Cable (RJ-45)	100BASE-FX SFP up to 2km reach over MMF (Duplex LC)
1000BASE-SX SFP up to 550m reach on MMF (Duplex LC)	100BASE-LX SFP up to 10km (LC)
1000-BASE-LX SFP up to 550m reach on MMF, and up to 10 km on SMF (Duplex LC)	100BASE-BX10-U up to 10 km - SFP Bidirectional upstream 1310nm TX
1000BASE-XD CDWM SFP up to 40 km reach on SMF (Duplex LC)	100BASE-BX10-D up to 10 km - SFP Bidirectional upstream 1530nm TX
1000BASE-ZX CDWM SFP up to 70 km reach on SMF (Duplex LC)	100BASE-ZX 70-80km SFP 1550nm
1000BASE-EX SFP up to 120 km reach on SMF (Duplex LC)	10GBASE-LR/LW XFP up to 10 km reach on SMF
1000BASE-BX SFP up to 10 and 40 km reach variants on SMF (LC)	10GBASE-SR XFP up to 300m reach on MMF
	10GBASE-ZR/ZW XFP up to 80 km over SMF
	Ethernet-over-T1 SFP up to 2,874m reach over 22AWG Cable (RJ-48C)

## Model #: SMART3000RMXL2U

**SmartPro 3kVA Line Interactive Sine Wave UPS, 2880 watts, SNMPWEBCARD option, 2U Rack/Tower, USB, Serial, EPO, 120V**

### Highlights

- 3kVA / 3000VA / 2880W line interactive 2U rack/tower UPS; 0.96 power factor
- 120V nominal output during brownouts to 83V and overvoltages to 145V
- USB, RS232, EPO & optional SNMP/Web card are available for simultaneous use
- Front panel status LEDs with load level and battery capacity display
- Expandable runtime; 96% line-mode efficiency; 3 switched output load banks
- NEMA L5-30P input; 8 NEMA 5-15/20R & 1 L5-30R outlets

### Description

3000VA / 3kVA 120V line interactive 2U rack / tower UPS offers complete network-grade power protection with full support for hot-replacement of separate internal battery and electronics modules. High .96 power factor supports loads up to 2880 watts. High efficiency rating of 96% reduces electrical operating cost and BTU emissions. Supports 120V 60Hz operation. Maintains battery derived sine wave AC output during power failures. Line-interactive dual-boost, single cut automatic voltage regulation (AVR) provides regulated 120V nominal output during brownouts and overvoltages. Includes NEMA L5-30P input plug and 9 UPS-supported output receptacles (8 x 5-15/20R, 1 x L5-30R). Includes two individually controllable switched outlets for advanced remote-reboot and load-shedding applications. Network-grade AC surge and noise suppression. Network management interfaces support simultaneous communications via USB, DB9 serial and card slot for optional SNMPWEBCARD and other card accessories. HID-compliant USB interface enables integration with built-in power management and auto shutdown features of Windows and Mac OS X. Supports detailed monitoring of equipment load levels, self-test data and utility power conditions via all three network interfaces at once. Advanced LED indicators offer 3-stage metering of UPS load and battery charge levels, plus single-LED status indicators for utility power, voltage regulation, on-battery and replace battery. Audible alarms provide notification of on-battery, low-battery and overload conditions. Includes PowerAlert auto-shutdown and management software for complete monitoring, reporting and logging of all site and UPS operational conditions, plus support for advanced configurations involving load-shedding, remote-reboot and redundant dual-UPS applications. Internal batteries offer runtime of 10 minutes half load (1440 watts) and 3 minutes at full load (2880 watts). Runtime is expandable with optional BP48V24-2U (limit 1) and BP48V60RT3U (unlimited) external battery packs. Supports installation in 4 post racks with included accessories. 2 post rackmount, wall mount and tower stand accessories sold separate.

### Applications

Ideal for server, networking and telecommunications applications in rackmount, wallmount or tower format

### Package Includes

- UPS power module with internal batteries
- PowerAlert Software with USB, DB9 and EPO cabling
- 4 post rackmount installation accessories
- Owner's manual

### Features

- 3000VA / 3kVA 120V line interactive 2U rack / tower UPS for networks
- High power factor of .96 offers support for loads to 2880 watts
- High efficiency line power operation of 96% reduces UPS electrical operating cost and BTU emissions
- Supports selectable 120V nominal voltage operation at 60 Hz
- Sine wave AC output in AC and battery modes
- Line interactive UPS with Automatic Voltage Regulation (AVR)
- L5-30P input plug connects to 120V 30A utility receptacle
- Includes 9 UPS supported outlets (8 5-15/20R and 1 L5-30R)

- L5-30R outlet is ideal for the connection of a 120V 30A PDU to distribute the full UPS capacity to rack equipment
- Two designated 5-15/20R outlets are individually controllable to support remote reboot or automated load shedding of less critical items
- Network-grade 570 joule AC surge suppression
- USB, DB9 serial and card-slot accessory are all available for simultaneous use in advanced network configurations
- HID compliant USB interface enables integration with built-in power management and auto shutdown features of Windows and Mac OS X
- Includes PowerAlert auto-shutdown and management software for complete monitoring, reporting and logging of all site and UPS operational conditions, plus support for advanced configurations involving load-shedding, remote-reboot and redundant dual-UPS applications
- Advanced LED indicators offer 3-stage metering of UPS load and battery charge levels, plus single-LED status indicators for utility power, voltage regulation, on-battery and replace battery. Audible alarms provide notification of on-battery, low-battery and overload conditions
- Audible alarms provide notification of on-battery, low-battery and overload conditions
- Internal batteries offer runtime of 10 minutes half load (1440 watts) and 3 minutes at full load (2880 watts)
- Runtime is expandable with optional BP48V24-2U (limit 1) and BP48V60RT3U (no limit) external battery packs
- Some external battery configurations require the use of Tripp Lite's **External Battery Configuration Software** (see manual)
- Supports 4 post rackmount installation with included accessories: add 2POSTRMKITWM for 2 post and wallmount applications; add 2-9USTAND accessory for upright tower support

## Specifications

### OUTPUT

Output Volt Amp Capacity (VA)	3000
Output kVA capacity (kVA)	3
Output Watt Capacity (watts)	2880
Output kW capacity	2.88
Output power factor	1
Nominal Output Voltage(s) Supported	120V
Frequency compatibility	60 Hz
Output voltage regulation (line mode)	120V (+6%, -14%)
Output voltage regulation (Battery mode)	+/-5%
Built-in UPS output receptacles	8 5-15/20R outlet(s); 1 L5-30R outlet(s)
Built-in controllable switched load banks	Two switchable single outlet 5-15/20R load banks
Output circuit breaker	15A (x2) - 4 5-15/20R outlets each; L5-30R outlet is non-breakered
Output AC waveform (AC mode)	Sine wave
Output AC waveform (battery mode)	Pure Sine wave
<b>INPUT</b>	
Rated input current (at maximum load)	24A
Nominal Input Voltage(s) Supported	120V AC
UPS input connection type	L5-30P

UPS Input cord length (ft.) 10 ft.

UPS Input cord length (m) 3.05

Recommended Electrical Service 30A 120V

Input cord length (ft.) 10

Input cord length (m) 3

#### **BATTERY**

Full load runtime (minutes) 3 min. (2880w)

Half load runtime (minutes) 10 min. (1440w)

Expandable battery runtime Extended runtime supported via optional external battery packs

External battery pack compatibility BP48V24-2U (limit 1); BP48V60RT-3U (multi-pack compatible)

DC system voltage (VDC) 48

Battery recharge rate (included batteries) Less than 5 hours to 90%

Replacement battery cartridge (internal UPS battery replacement) RBC58-2U

Battery Access Front panel battery access door

Battery replacement description Hot-swappable, replaceable batteries

#### **VOLTAGE REGULATION**

Voltage regulation description Automatic voltage regulation (AVR) maintains line power operation with an input voltage range of 83 to 147

Overvoltage correction Input voltages between 127 and 145 are reduced by 12%

Undervoltage correction Input voltages between 108 and 96 are boosted by 12%

Severe undervoltage correction Input voltages between 83 and 95 are boosted by 24%

#### **LEDS ALARMS & SWITCHES**

LED Indicators LEDs indicate line power, power fail, avr, load level and replace battery conditions; includes tri-color LED load and battery charge metering

Alarms Audible alarm indicates on battery, low battery and overload warnings

Alarm cancel operation Power-fail alarm can be silenced by pressing the on/test/mute switch

Switches 2 Switches control off/on power status and alarm-cancel/self-test operation, rear panel dipswitch controls low/high charger settings (see manual)

#### **SURGE / NOISE SUPPRESSION**

UPS AC suppression joule rating 570 joules

EMI / RFI AC noise suppression Yes

AC suppression response time Instantaneous

**PHYSICAL**

Installation form factors supported with included accessories 4 post 19 inch rackmount (mounting rail kit included)

Installation form factors supported with optional accessories 2 post rackmount (2POSTRMKITWM); Wallmount (2POSTRMKITWM); Tower (2-9USTAND)

Primary form factor Rackmount

UPS / Power Module dimensions in primary form factor (height x width x depth / inches) 3.5 x 17.5 x 19

UPS / Power Module dimensions in primary form factor (height x width x depth / cm) 8.9 x 44.4 x 48.3

Installed whole system total rack space height (rack spaces) 2U

Secondary form factor Tower (requires 2-9USTAND)

UPS / Power Module weight (lbs) 64

UPS / Power Module weight (kg) 29.1

UPS Shipping dimensions (height x width x depth / inches) 9 x 23.5 x 20

UPS Shipping dimensions (height x width x depth / cm) 22.9 x 59.7 x 50.8

Shipping weight (lbs) 72

Shipping weight (kg) 32.7

UPS housing material Steel

Cooling method Fan

**ENVIRONMENTAL**

Operating Temperature Range +32 to +104 degrees Fahrenheit / 0 to +40 degrees Celsius

Storage Temperature Range +5 to +122 degrees Fahrenheit / -15 to +50 degrees Celsius

Relative Humidity 0 to 95%, non-condensing

AC mode BTU / hr. (full load) 433

Battery mode BTU / hr. (full load) 1594

**COMMUNICATIONS**

Communications interface USB (HID enabled); DB9 Serial; EPO (emergency power off); Slot for SNMP/Web interface

**Network monitoring port description** Supports detailed monitoring of UPS and site power conditions

**PowerAlert software** Included

**Communications cable** USB, DB9 and EPO cabling included

#### LINE / BATTERY TRANSFER

**Transfer time** 5 ms (line to battery) / 2 ms (battery to line)

**Low voltage transfer to battery power (setpoint)** 83

**High voltage transfer to battery power (setpoint)** 145

#### SPECIAL FEATURES

**Cold Start (startup in battery mode during a power failure)** Cold-start operation supported

**High availability UPS features** Hot swappable batteries

**Green & high efficiency features** Greater than 95% efficiency - GREEN UPS; Individually controllable load banks

#### CERTIFICATIONS

**UPS Certifications** Tested to UL1778 (USA); Tested to CSA (Canada); Tested to NOM (Mexico); Meets FCC Part 15 Category A (EMI)

#### WARRANTY

**Product Warranty Period (U.S., Canada & Puerto Rico)** 2-year warranty, 3 year with registration. Note: registration is required for 3-year warranty.

**Connected Equipment Insurance (U.S., Canada & Puerto Rico)** \$250,000 Ultimate Lifetime Insurance

## Model #: SNMPWEBCARD

For remote monitoring and control via SNMP, Web, or Telnet.

### Highlights

- NEW firmware version 12.04.0055 now available! - supports SNMPv3
- Internal SNMP/Web management accessory card
- Simple installation and setup
- Data Logging
- Event Logging
- Flash Upgradeable
- Scheduling
- Email Notification
- NOTE: Existing 12.04.0048, 12.04.0049, 12.04.0051 and 12.04.0052 cards can be upgraded to the new firmware to provide SNMPv3 support

### Description

Tripp Lite's SNMPWEBCARD allows network users to operate any expansion slot-equipped Tripp Lite SmartPro or SmartOnline UPS as a managed device on the network. Enables remote monitoring and control of UPS and site electrical conditions using the SNMP network management platform or a web browser. Provides remote viewing of site electrical data, UPS status information and self-test logs. Supports selective rebooting of locked network equipment without disrupting power to other devices when used with customized load management receptacles available on select Tripp Lite UPS systems. Optional ENVIROSENSE module provides remote temperature/humidity monitoring and a dry contact interface to control and monitor alarm, security and telecom devices. NEW firmware version 12.04.0055 now available! - supports SNMPv3. Firmware is not applicable with cards running firmware version 12.04.0047 or earlier. NOTE: Existing 12.04.0048, 12.04.0049, 12.04.0051 and 12.04.0052 cards can be upgraded to the new firmware to provide SNMPv3 support

#### Applications

- Ideal for remote management and control of UPS and power data in LAN/WAN racks, computer rooms and datacenter environments

#### Package Includes

- SNMPWEBCARD
- Quick Start Installation Guide
- Configuration Cable
- Software CD including Owner's Manual & MIB files
- Cover Plates (secures card in UPS system's SNMP accessory slot)

### Features

- NEW firmware version 12.04.0055 now available! - supports SNMPv3 - NOTE: Existing 12.04.0048, 12.04.0049, 12.04.0051 and 12.04.0052 cards can be upgraded to the new firmware to provide SNMPv3 support
- Makes any slot-equipped Tripp Lite UPS a managed device on the network, controllable using SNMP network management platforms or a web browser
- Web interface provides remote viewing of current site electrical data, UPS self-test and alert logs, as well as logged power events such as blackouts, brownouts, overvoltages, and other electrical problems
- Offers the ability to control UPS output power and remote reboot of locked network devices without interrupting power to other loads when used with any Tripp Lite UPS equipped with load management receptacles
- DHCP/Manual configuration support provides the ability to have network settings automatically assigned to the card, or manually assigned via permanent IP addresses
- 10/100 Mbps auto-sensing allows optimal communication compatibility with your current 10/100 Base-T network
- Real-time clock support maintains the time of day and date even if the UPS is shut down
- NTP (Network Time Protocol) support gives the card the ability to receive automatic updates to its real-time clock from a NTP server

- 2-tier level access allows an administrator and a guest to log into the web browser for monitoring and/or management of slot-equipped Tripp Lite UPS systems
- Multiple user support allows for viewing by a number of users at the same time
- Full Telnet access gives you the ability to remotely monitor and manage your UPS system via a TELNET session
- Optional SSL (Secure Socket Layer) security setting provides the capability to create an encrypted connection to the card via a web browser
- Offers the ability to shut down remote operating systems through your networks. (Supported operating systems must have Power Alert 12 installed. See **PowerAlert** section for software support)
- Alert notifications via email or SNMP traps give users the added advantage of having an immediate event notification sent to them as a result of a site electrical or UPS problem.
- Protocols supported include HTTP, HTTPS, PowerAlert Network Management System, SMTP, SNMPv1, SNMPv2, Telnet, SSH, FTP, DHCP, BOOTP
- RoHS Compliant
- 2-year product warranty

# Intel® Learning Series

Advancing Education Worldwide

8 de Marzo de 2012

Intel se complace en notificar la reciente incorporación de la compañía Babilon Technologies, Inc. a la Alianza del Intel® Learning Series; decisión tomada luego de una cuidadosa inspección y precalificación de la misma. La empresa se caracteriza por ser de vanguardia en la manufacturación de programas con soluciones educativas, basadas en tecnología de Intel® Learning Series. Babilon Technologies es actualmente el único proveedor, LOEM (“Local Original Equipment Manufacturer”) de Puerto Rico y el Caribe de Intel® Learning Series, un programa para empresas que proporcionan soluciones educativas basadas en tecnología de Intel® Learning Series.

Babilon es símbolo de excelencia en el servicio, ya que es uno de los primeros proveedores de soluciones de e-learning 1:1. Por consiguiente, cuenta con una vasta experiencia y comprensión en todo lo relacionado al programa Intel® Learning Series. Requisito primordial al momento de seleccionar un nuevo miembro de la Alianza, debido a que se maneja información confidencial y se crean soluciones de e-learning 1:1 de alto valor basados en tecnologías líderes en la industria.

En conclusión, Babilon ofrece la plataforma de Intel® Learning Series, las computadoras desarrolladas para entornos educativos - classmate PCs - y la suite de software Intel® Learning Series a todos sus clientes. También, cuenta con acceso a los recursos de Intel confeccionados para este programa con la finalidad de ofrecer servicio al cliente y apoyo durante y después de la implementación. Servicios que sólo Babilon con su experiencia desempeñará con profesionalismo y dedicación; resaltando el nombre de la Alianza de Intel® Learning Series.

Gracias por su interés en los servicios de la compañía Babilon y las soluciones e-learning 1:1 de Intel® Learning Series.

Brian González,  
Intel Corporation  
World Ahead  
Director of Education

## Intel® Learning Series

Advancing Education Worldwide

25 de marzo de 2011

Gobierno de Puerto Rico

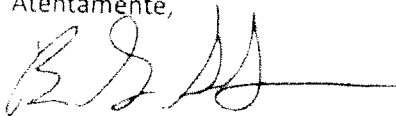

Señoras y señores:

Intel® Corporation se complace en notificar la reciente incorporación de la compañía Babilon Technologies, Inc. a la Alianza del Intel® Learning Series; un grupo de empresas que proporcionan soluciones educativas basadas en arquitectura de Intel®. Babilon Technologies manufactura programas con soluciones educativas, basadas en la arquitectura Intel y es actualmente el único proveedor para Puerto Rico y el Caribe de programas y soluciones educativas del Intel Learning Series.

Babilon cuenta con experiencia y comprensión en todo lo relacionado al Intel® Learning Series. Como todo miembro de la Alianza del Intel Learning Series, Babilon ofrece a todos sus clientes la plataforma de Intel® Learning Series, las unidades de educación desarrolladas por Intel Corporation para entornos educativos - classmate PCs - y los programas de software que conforman el Intel Learning Series.

Gracias por su interés en las soluciones de educación de Intel® Learning Series.

Atentamente,

Brian González, Gerente  
Intel Corporation  
Intel World Ahead

**JUNTA PARA LA INVERSIÓN EN LA INDUSTRIA PUERTORRIQUEÑA**

15 de febrero de 2012

Joe Padilla  
Babilon Technologies, Inc.  
Calle Pimentel # 27  
Río Grande, PR 00745

Estimado (a) señor (a) Joe Padilla

En la reunión ordinaria del 14 de febrero de 2012, la Junta de Inversión para la Industria Puertorriqueña, aprobó su solicitud de parámetro de inversión (Resolución), la cual se incluye y tiene una vigencia de dieciocho (18) meses, según establecidos en el Reglamento para la Administración de la Ley de Inversión en la Industria Puertorriqueña, aprobado el 12 de febrero de 2004.

Esperamos que este beneficio que le concede la Ley # 14, del 8 de enero de 2004, sea de mucha utilidad a su empresa en la participación de las diferentes subastas en las agencias del gobierno.

De necesitar información, puede comunicarse al 787-758-4747, Ext. 2223 o 2618.

Atentamente

  
Lisbeth Marrero Torre

Secretaria Ejecutiva Interina  
Junta de Inversión  
Para la Industria Puertorriqueña

lmt

Anejos

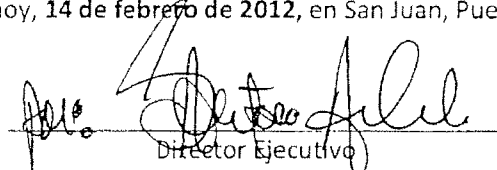

dichos productos y que ambos estén registrados y gocen de una clasificación por distribución, en el registro de la Junta de Inversión para la Industria Puertorriqueña.

El beneficio del por ciento de parámetro de inversión aquí concedido no se entenderá como un medio para aumentar el precio del producto, sino como uno para enfrentarse a la competencia en los procesos de compras gubernamentales.

La petición de renovación del por ciento deberá hacerse no más tarde del **14 de mayo de 2013 (90) días** previos a la fecha de expiración.

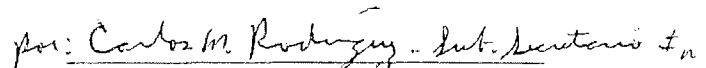

Esta resolución tendrá una vigencia de dieciocho (18) meses, hasta el **14 de agosto de 2013**.

Dado hoy, **14 de febrero de 2012**, en San Juan, Puerto Rico.

**Block 13: Offsetting Disbursement Payments Against Federal Universal Service Contribution Obligations**

See Instruction Section III.N

The following information pertains only to telecommunications companies participating in the Schools and Libraries and Rural Health Care Support mechanisms. In accordance with FCC rule section 54.515 regarding Schools and Libraries Support mechanism payments, a telecommunications company may choose to offset its Schools and Libraries Support Mechanism payment against its Federal universal service contribution. In accordance with FCC rule section 54.611 regarding Rural Health Care Support Mechanism payments, a telecommunications company MUST offset its Rural Health Care Support Mechanism payment against its Federal universal service contribution. A telecommunications company must have an FCC Form 499 Filer ID number in order to offset its Schools and Libraries or Rural Health Care Support Mechanism payments against its Federal universal service contribution. In order to obtain an FCC Form 499 Filer ID number, visit [www.universalservice.org/forms](http://www.universalservice.org/forms) and select FCC Form 499. You do not need an FCC Form 499 Filer ID in order to be issued a SPIN.

117  Yes, I want my Schools and Libraries Support Mechanism disbursement payments to be offset against my Federal universal service contribution obligations. This box must be checked in order to receive offsets. The default is "No."

**Block 14: Principal Communications Types [REQUIRED Field]**

See Instruction Section III.O

Select up to 5 boxes that best describe the reporting entity. Enter numbers starting with "1" to show the order of importance - see instructions.
