I. ABOUT THE PUERTO RICO DEPARTMENT OF EDUCATION

1. OVERVIEW

The Puerto Rico Department of Education (the “Department,” “PRDE”) is the government agency that directly runs and operates Puerto Rico’s public school system. Unlike most states, the PRDE acts both as a State Educational Agency (SEA), and as a Local Educational Agency (LEA). Information concerning the approximate size of the PRDE school system is as follows:

THE PRDE SCHOOL SYSTEM*	
Students:	300,000
Schools:	856
Educators:	25,000
Educational Regions:	7

*Estimates

A list of 2018-2019 schools is posted on the Department’s website at www.de.pr.gov. Updates will be posted from time to time to reflect any closings or consolidations approved for next year. Proposers are encouraged to check the Department’s website frequently for updated information.

2. TECHNOLOGY GOALS

The Department considers technology to be a vital and effective vehicle for empowering transformation of learning, schools, students and educators through creative processes and innovation. Our primary goals for technology in our school system are as follows:

- A. Technology will be available and reliable.
- B. Wired and wireless access will be available in every classroom, in every school
- C. All schools will transmit data within the Wide Area Network (WAN) at a minimum of 750 MB speeds, and each school will have at least a 750 MB connection to the Internet Service Provider.
- D. Students and staff will be able to connect to the network quickly, they will be assigned a set of permissions to the network, and they will be able to work with Department-owned devices.
- E. Within the next three (3) years, we will work to achieve 25% of all our students having mobile devices and for 60% of 6th, 7th and 8th graders having mobile devices in their schools.
- F. Provide support multiple cloud-based platforms for collaboration and creation (i.e. Google Apps for Education (GAFE), Office 365).
- G. Evaluate technology competencies of teaching staff.
- H. Create a digital resource for student learning and training educators.
- I. Provide on-demand online learning opportunities for educators and students to improve technology skills and content knowledge as well as face-to-face training in small and large groups.

- J. Develop an integrated planning model that includes Title 1, Special Education, Teaching and Learning, Instructional Coaches and educators with regard to software and hardware selection and implementation.
- K. For all of our educators to feel confident to support students' growth as digital citizens.
- L. Enable a rich technology curriculum at every grade level.
- M. Create innovative learning spaces at all of our schools.
- N. Create technology strategies to support instructional transformation.
- O. Professional development training for all educators on integrating technology into curriculum

Further, our vision for student use of technology centers on grade-level curriculum rather than in terms of "Technology," "IT," or "Digital" and leads to each student being able to --

- A. Demonstrate age-appropriate keyboarding speed and accuracy
- B. Demonstrate the ability to solve the most common tech problems
- C. Demonstrate use of tech tools outside of class
- D. Differentiate between tech tools and understand how each is uniquely suited to a task, purpose, and audience
- E. Learn to transfer knowledge of technology from known skills to unknown skills
- F. Learn to transfer knowledge of technology from tech class to other classes and home
- G. Demonstrate and practice safe, responsible and legal use of technology

3. TECHNOLOGY PLAN

As the third largest public school system in the United States (based on student enrollment), the Department faces significant challenges, and sees technology as one important tool to help meet those challenges. Where student technology access is available, it is often in a traditional "computer lab" setting rather than integrated into the everyday classroom curriculum.

The Department's 2014 - 2019 Technology Plan (the "Technology Plan") was approved by the U.S. Department of Education. The Technology Plan outlines how the Department intends to meet these and related challenges over the coming years by leveraging newer technologies in better ways to improve educational outcomes significantly.

The Technology Plan was prepared at a time when several significant trends were converging to galvanize a change in education, including major shifts in how educators think about and deploy technology to enhance student achievement. Some examples of these include the rapid adoption of mobile devices and tablets at an unprecedented rate because smaller devices take less space in the classroom, use less power and are more student-friendly. The norm for educational computing has become a 1:1 ratio of mobile computing devices to users.¹¹ Also, the adoption of "cloud-based" computing, or moving "everything" – from educational software applications, to multimedia content, to standardized assessments, to student work – out to the Internet, is popular because of its convenience and also since it reduces the need for schools to use highly skilled IT labor to manage file servers and disk images, which thereby cuts IT costs. These new technology measures require *much* higher bandwidth Internet connections and the infrastructure to distribute that bandwidth to the classrooms.

¹¹ 5 K-12 Ed Tech Trends for 2012," <http://thejournal.com/articles/2012/01/10/5-k-12-ed-tech-for-2012.aspx>.

In addition, in June 2013, former President Obama announced the ConnectED initiative which set a five-year goal of high speed connectivity for all schools and reflects a widespread recognition of these new educational trends. The Department embraces these trends and changes in technology and utilizes this RFP to leverage the technology needed to provide a quality education to every child. The Technology plan and RFP are closely related as the RFP solicitation must mirror the technology goals of the Technology Plan, ensuring that it is requesting the appropriate equipment and services in order to meet the needs of the Department. Specifically, the RFP bases much of what it is soliciting for proposals on the Technology Plan Infrastructure, or Element 3 of the Technology Plan, where it discusses a needs assessment of telecommunication services, hardware, software, Internet connectivity and its distribution and other services that will be needed to improve education.

II. GENERAL INVITATION

1. OBJECTIVE

The Department is requesting proposals pursuant to **RFP No: PRDE-OSIATD-FY2018-002-Mobile Devices, Professional Development and Project Management** (hereinafter, this “RFP”). The equipment and services described in this RFP shall be procured through PRDE’s Office of Information Systems and Technology Support for Teaching (“OSIATD”) for all of the Department’s schools (PRDE Schools). The Department’s goal is to provide mobile devices to 60% of students in 6th, 7th and 8th grades, to 25% of all other students and to 30,000 eligible educators.

The Department is interested in selecting the best solutions for the deployment and maintenance of mobile devices, for professional development and curriculum integration services for the Department’s students and educators, and for technical training for OSIATD personnel. These SEAs, in turn, are to provide assistance or services to local educational agencies (LEAs) to help defray expenses related to restarting school operations and restoring the normal learning environment for students and families affected by the hurricanes and wildfires. PRDE was awarded \$589 million in Restart funding.

The Restart funds are committed and fixed for the full 3-year term of the contract; funding for the three (3) one-year renewal options is contingent on future appropriation(s) for the renewal period. The fixed Restart funds allocated for the mobile devices, professional development, repair and other related services are sufficient to cover all costs of the 3-year contract.

Restart funds support, among other products and services, the following:

- (a) Rebuilding school district communication and information networks, including restoring Internet connectivity by rewiring routers, switches, hubs, computers, and printers;
- (b) Replacing homework software systems;
- (c) Replacing wireless network connectivity for portable classrooms;
- (d) Replacing technology equipment, including phone and intercom systems;
- (e) Hiring additional technical staff to install wiring, hardware, and software;

III. REQUESTED EQUIPMENT AND SERVICES

1. INTRODUCTION

In support of the increased number of tablets and laptops, the wireless infrastructure will be upgraded up to 750 MB during the 2018-2019 school year, and potentially up to 1 GB the following year, to facilitate the increased wireless usage.

The Department intends to deploy more than a hundred thousand mobile devices, including tablets, laptops, and convertible devices during the next school year. The emphasis will be given to middle schools (6th, 7th and 8th grade). The mobile devices will be stored in carts in the targeted classrooms. During years two and three of the contract, students may be given the opportunity to take their device home. Carts are also provided for targeted classrooms to allow students who opt not to check out a device to use a device in class. Laptops will also be deployed to elementary and high schools in effort to reduce the student to computer ratio. The devices will be used to access a wide variety of digital curriculum materials, including textbooks. They are also instrumental in allowing schools to have technology so that they can complete computer based testing.

Software updates and policies for mobile devices are deployed through System Center Configuration Manager (SCCM).

Estimated device quantities are set forth in Paragraph 5 below.

2. RFP OBJECTIVES

The objective of this Request for Proposals (RFP) is to select Proposer(s) to purchase mobile device equipment, accessories, peripherals, and supplies, and to provide maintenance, technical training and educator professional development and curriculum integration services for PRDE students and educators through a managed services contract in support of the Technology Plan. Services and/ or equipment are required to be provided at school sites Territory-wide. The Department's goal is for deployment of the devices to begin in January 2019. Further, the Department expects selected Proposer(s) to perform professional development each trimester of the contract.

3. ORIGINAL EQUIPMENT MANUFACTURERS (OEM)

Proposals may be submitted by an Original Equipment Manufacturer (OEM) separately or in conjunction with local Proposer partners or vice versa. Proposers may also choose to subcontract with a separate entity for asset and inventory management and/or mobile tracking solutions.

4. PRICE ADJUSTMENTS AND/OR PRODUCT SUBSTITUTIONS

It is expected that the prices submitted shall remain firm for 180 days from the date of the proposal, and that the prices set forth in the approved contract shall remain firm for the entire contract and extension periods (if any), as stated above.

Throughout the term, approved devices may be discontinued and/or become obsolete. The awarded Proposer(s) shall propose one (1) or more substitution products. The substitution product must equal

or exceed the specifications of the model that it is replacing. Changes in models will only be made during the summer between the school years. When feasible, pricing for the newer model should be at the same or lower cost as the model it is replacing. Either way, product substitution and updated pricing costs MUST be approved by the Department prior to distribution. The product substitution request MUST be submitted to OSIATD for review and approval by staff in OSIATD.

If mutually agreed upon, the price adjustment(s) and/or product substitutions shall be valid for the remaining term of the contract, including any extension thereof. PRDE reserves the right to approve requests for product substitutions and price adjustments or to disapprove and to secure new quotations.

5. MOBILE DEVICES

A mobile wireless computing device will be provided for each participating user in participating schools. All devices will be deployed according at the Department’s ’s discretion. No experimental or unproven technology will be accepted. No used, refurbished, reconditioned, or “grey market” devices will be accepted.

Device Quantities

It is anticipated that approximately 159,330 devices will be purchased during the first year of the contract, as follows:

Approximate Anticipated deployment	Est. Quantity
Kindergarten through 2 nd grade	18,000
Elementary school grades 3 rd , 4 th and 5 th , and high school grades 9-12	42,000
Middle school grades 6 th , 7 th and 8 th	43,200
Educators	30,000
School Labs (30 devices plus 1 cart per school)	26,130
SUBTOTAL	159,330
School-based Inventory for Quick Swaps	TBD

The above mentioned quantities are only estimated amounts. The Department shall be under no obligation to acquire any minimum or maximum number of devices. The Department shall solely acquire the number of devices it deems adequate to fulfill its objectives under its Technology Plan, subject to any budget constraints and other considerations.

1. Educators

Educators in targeted courses will be equipped with a portable, digital, interactive, computing device (hereafter referred to as the “educator’s device”). The educator’s device may be the same as the student’s device or may be the same device with additional capabilities. In either case, the educator’s device must satisfy educational and practical functional goals in the classroom as well as allow for lesson preparation.

2. Students

Subject to budget constraints and other considerations, students in designated classes will be equipped with one portable digital, interactive, computing device.

3. Special Ed Students and Students and Educators with Disabilities – Accessibility

It is the intent to purchase hardware and software that provides the highest degree of accessibility to all users, including users who may have an impairment that interferes with the use of the device. The solution will have the capacity to interface with peripherals, software and assistive technologies used by students, educators and others with visual, hearing, mobility, communication and/or cognitive impairments and will conform to applicable technical and functional performance criteria of Section 508 of the Rehabilitation Act of 1973 unless exempt. For full guidelines, go to: <http://section508.gov>.

The Department is interested in devices that have features that allow students with special needs to personalize their use. For example, a student with a mild to moderate visual impairment may be best served by double-tapping or dragging their fingers to magnify text and photos, whereas a student with a more severe visual impairment can have text read aloud. Students with hearing deficits can use captioning to experience audiovisual materials. These capabilities allow students with special needs to learn without a special curriculum. They can consume — and learn — the same materials as their peers, which helps prepare them for the same assessments. Additionally, being on the same timeline and curriculum as their peers can help ensure that students with special needs develop positive self-esteem and the skills they need to succeed after graduation.

Proposals should include a description of available accommodations for students and educators with disabilities and for English Language Learners and Special Ed student populations.

There must not be a need for complex and expensive adaptation and/or specialized design to meet the needs of users. The design will communicate necessary information in as many different forms as possible (e.g., verbal, auditory, tactile, pictorial) to accommodate needs. It shall be of appropriate size and be operable in at least one mode for those with limited hand, arm, leg or trunk strength, flexibility and range of motion. Space will be provided for approach, reach, manipulation and use regardless of a user's body size, posture or mobility.

The Proposer must describe to what extent its proposed solution satisfies the accessibility requirement. This will include a description of whether and how the device provides the functionality and/or the capability to interface with peripherals, software and assistive technologies for visual, hearing, mobility, communication and cognitive impairments.

To be considered eligible for award, all proposed goods and/or services should meet the applicable standards and provisions of the Architectural and Transportation Barriers Compliance Board (the "Access Board"), an independent Federal agency, whose primary mission is to promote accessibility for individuals with disabilities. These standards are codified as 36 CFR Part 1194 and may be accessed through the Access Board's web site at <http://www.access-board.gov>. Alternatively, Proposers may propose goods or services that provide equivalent facilitation. Such proposals will be considered to have met the provisions of the Access Board's standards for the feature or component providing equivalent facilitation. If none of the proposals meet all applicable provisions of the Access Board's standards, those proposals whose products or services meet some of the applicable provisions will be considered eligible for award.

6. EQUIPMENT AND SERVICES

This RFP requests proposals for three general (3) categories of services – (1) Mobile Devices and Carts, (2) Professional Development, Curriculum Integration and Technical Training, and (3) Project Management and Asset Inventory Management and Tracking. Proposers may submit proposals for 1, 2 or all 3 categories of services. Proposers may also bid on one (1) or all Parts of a category of services, but Proposers should note that up to 15% of the total evaluation points may be awarded to proposals that present comprehensive solutions to deliver fully-integrated services for all categories of service (See Section VIII for additional information on the evaluation criteria and weights to be applied by the Evaluation Committee in assessing proposals). Each category of service (and each Part thereof) in proposals will be evaluated separately based on the evaluation criteria identified in Section VIII of this RFP.

The Department may (a) award contracts for each of the categories of services to two (2) or three (3) different proposers or (b) award a single contract for all service categories to a single proposer. The award(s) will be based on the ratings assigned to each category of service proposal submitted.

6.1 CATEGORY 1 SERVICES: MOBILE DEVICES AND CARTS

Proposals for Category 1 Services should include all of the services specified for Category 1 Services Part A and/or B as follows:

Such Electronic Record shall be established to generate an automatic notification and electronic record regarding compliance with the commitments under the SLA and shall be sent to the designated contact of both the selected Proposer(s) and the Department. The Proposer is responsible for designing and presenting in its proposal the detailed software specification and plans that ensure accuracy and security to prevent tampering or altering the data.

For any month Proposer fails to meet all commitments under the SLA for delivery of mobile devices or for performance of repair services within the time period specified in the SLA (including but not limited to device delivery, response time to acknowledge repair requests, installation and setup time schedules or the established repair period), the Proposer shall, without prejudice to any other remedies available under the contract, pay to the Department liquidated damages ("Liquidated Damages") as set forth in this section.

The amount of liquidated damages the Proposer shall pay to the Department shall be \$250.00 for each business day per device that exceeds (i) the delivery, installation and set-up time schedule pursuant to the contract and/or SLA; (ii) the Guaranteed On-Site Initial Response Time established in the SLA; and/or (iii) the Guaranteed Repair and Replacement Times under the SLA. In instances when the Proposer successfully establishes to the Department that Liquidated Damages should not be imposed, the Department shall pay an amount equal to the successfully challenged Liquidated Damages previously paid by the Proposer or deducted by the Department.

If the Proposer fails to submit a Response to a Claim for Liquidated Damages within 30 days of receipt of a Liquidated Damages Notice delivered in accordance with the requirements of this section, the Liquidated Damages set forth in the Liquidated Damages Notice shall be deemed accepted and agreed to by the Proposer.

The PRDE and Proposer further agree that the imposition of liquidated damages is a reasonable measure of the PRDE's damages related to performance under the SLA.

Notwithstanding the foregoing, failure by the PRDE to assess liquidated damages in any particular instance shall not preclude, or constitute a waiver, of the PRDE's right to assess such damages at a later time, or on a subsequent occasion. The PRDE's right to assess liquidated damages shall not preclude the assertion of, or be exclusive of, any other available remedy, including the right to terminate the contract, in whole or in part, or the right to seek damages for an unspecified amount for other failures to perform under the contract. The PRDE may assess liquidated damages in the amounts set out in the contract on a per occurrence basis.
