#### Comentarios:

A tenor con los resultados de la inspección ocular realizada por este servidor, utilizando mi mejor apreciación y criterio técnico concluyó que las estructuras que conforman el plantel escolar no aparentan haber sufrido daños en sus elementos estructurales a causa de los eventos sísmicos ocurridos en el periodo entre el pasado 28 de diciembre de 2019 y la fecha de mi inspección.

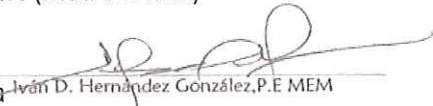

Sin embargo, aún cuando el plantel se encuentre en buen estado, el plantel requiere un plan de mantenimiento de estructuras que le permita que los edificios que componen la escuela estar en un mejor estado. Existen grietas en el edificio en paredes no estructurales, juntas mecánicas entre estructuras que requieren que sean reparadas y/o reemplazadas al igual que problemas con filtraciones de agua en algunos edificios.

Las observaciones de daños incluidos en este reporte se refieren a daños relacionados única y exclusivamente con los eventos dentro del periodo del 28 de diciembre de 2019 al día de la visita de inspección. Daños identificados como preexistentes no están incluidos en el listado que forma parte del reporte.

(Ver Anejo A para más detalle)

Se debe entender que este informe está basado solamente en una inspección ocular de las facilidades con el propósito de observar en las escuelas la presencia de daños significativos causados por los eventos sísmicos registrados hasta la fecha de este informe. La determinación de la adecuación estructural de las escuelas y su cumplimiento con los códigos aplicables de diseño o construcción, al igual que el desarrollo de recomendaciones para la rehabilitación de las facilidades, requerirá una evaluación detallada.
